QLUB2026

Your one-page briefing

The Overview tells the story in four blocks: thesis, market reach, performance index, and the LA density map.

- **Strategic Intelligence** — the one-line GTM thesis.
- **Market Reach (31K)** — total addressable LA tables, in real-time growth sync.
- **Performance Index** — 4 KPIs (Target Velocity, Revenue Efficiency, Checkout Time, Friction). Hover the (i) icon on any metric for a 1-line plain-English explanation.
- **LA Restaurant Density Map** — neighborhood-level prospect counts.

Who Qlub wins with

Six honest, generic attributes — no fake scoring. Plus a hard **Anti-ICP** list so SDRs know who to walk away from on the first call.

TARGET ATTRIBUTES

Modern POS, integration-ready, high-velocity service, close-out pain, prime location, guest-first operator.

ANTI-ICP

QSR, legacy POS, tasting-only, chain procurement, zero review presence — say no early.

IDEAL CUSTOMER PROFILE

WHO QLUB WINS WITH

The traits we look for in a restaurant before we open a conversation.

TARGET ATTRIBUTES

MODERN POS IN PLACE

Already running a POS — Qlub replaces the bill-pay step, not the whole system.

INTEGRATION-READY

POS exposes an API or has a Qlub connector available. No custom middleware required.

HIGH-VELOCITY SERVICE

Busy service, table turns matter, split-checks are routine.

OPERATIONAL PAIN AT CLOSE-OUT

The bill-wait and check-splitting steps slow down the end of every meal.

PRIME LOCATION

Visible, high-traffic neighborhood where dining is a destination, not a commodity.

GUEST-FIRST OPERATOR

Leadership cares about the dining experience and is willing to try a new pay flow.

ANTI-ICP

WHO TO WALK AWAY FROM

Saying no early saves everyone time. These aren't Qlub's fight.

QSR / counter-service only

Legacy POS with no integration path

Tasting-only / single-check venues

Chain/franchise with centralised procurement

Zero online review presence

POSITIONING LINE

"Qlub helps restaurants close more tables at peak by letting the guest pay the second they're ready — no waiter, no wallet."

QLUB · LA MARKET INTELLIGENCE · V0.9.2

NYU · STERN RESEARCH · 2026.01

Made with Emergent

65 real LA venues — 50 prospects + 15 anti-segment cash-only. POS systems shown only when a public citation exists; otherwise it reads *"POS not detected"*. No guesses.

- **Search** by name, cuisine, or neighborhood.
- **Region, Cuisine, POS, Segment** filters — combine freely.
- **Valuation column** shows public revenue estimates.
- **Click any row** for the detail modal with POS evidence URL + Qlub fit verdict.

HOW WE CLASSIFY A Qlub PROSPECT

The 3-rule qualification

Click "How we classify a Qlub Prospect" in the source panel to expand the explainer. A venue must meet all three:

- 1

Sit-down / full-service — Qlub is a pay-at-table product.
- 2

Modern POS with an integration path (Toast, Micros, Square, Clover, Aloha, TouchBistro) — or unverified but format fits, so an SDR can confirm in a 2-minute call.
- 3

≥ 1 close-out / billing / wait-time pain point in public reviews — the exact friction Qlub removes.

Cash-only / food-truck / pop-up venues are marked Anti-Segment because there's no POS to integrate with.

52 PROSPECT VENUES

6 POS VERIFIED WITH PUBLIC CITATION

15 NO-MODERN-POS VENUES (ANTI-SEGMENT)

POS system is shown ONLY when a real public citation was found. Otherwise it reads 'POS not detected' — no guesses.

HOW WE CLASSIFY A Qlub PROSPECT

A venue is a 'Qlub Prospect' when it meets ALL three: (1) it's a sit-down / full-service restaurant (Qlub is pay-at-table), (2) it runs a modern POS that exposes an integration (Toast, Micros, Square, Clover, Aloha, TouchBistro) OR the POS is unverified but the venue format fits (so the SDR can verify in a 2-minute call), (3) public reviews show at least one close-out / billing / wait-time pain point — the exact friction Qlub removes. Cash-only / food-truck / pop-up venues are marked 'Anti-Segment' because there is no POS to integrate with.

From insight to email — instantly

The **Closing Console** sidebar is locked until you narrow to **one specific restaurant**. That guarantees the email is grounded in real, cited pain points for that venue.

- 1

Pick a **Location** (e.g. Eastside).
- 2

Pick a **Restaurant** in that region (e.g. All Day Baby).
- 3

Sidebar flips to **READY** and shows the venue name.
- 4

Click **GENERATE OUTREACH** — Gemini drafts a subject + 120-word body.
- 5

Click **COPY EMAIL** and paste into Gmail / Outreach / Apollo.

Quantify the opportunity

Translate the pain points into a dollar number. Use the **Potential Recovery Calculator** to model annual revenue recovered by removing checkout friction at any venue.

- Slide the **Total Tables**, **Avg. Check**, and **Check-drop Delay** sliders.
- **Annual Recovery Goal** updates live (e.g. **\$112,200** at 25 tables / \$85 / 12-min delay).
- **Pain Point Spectrum** ranks the top 4 cited issues by intensity.
- **Neighborhood Specifics** shows where the pain (and therefore the upsell) is highest.
